DIMENSION / INTERFACE DEFINITION

Quantity3. Assigned material: AISI 4340 Steel, normalized.
Purchased ISO4762 dimensional reference M2.0x5.0; solid head/thread major envelopes, drive and helical thread omitted. 4340 library is a provisional steel mass proxy, not a certified fastener grade.
Specify grade8.8 minimum, supplier tolerances and approved tightening/locking before procurement.
RELEASE HOLD: supplied material, fits, finish, tolerances and approved loads/locking require review. Nominal thread envelopes are not tap-drill geometry.
Use model identified by SHA for referenced contour; this prototype inspection sheet does not release undimensioned manufacturing features.
